

Statistical Sherlock

You see... but do you observe?

Have you ever considered yourselves as a 'Consulting Detective' or a 'High Functioning Sociopath'?

Have you ever tried your Observation and Deduction Skills with your friends and ended up being mocked!!

Well the approach is simple. In the words of Sherlock "When you have excluded the impossible, whatever remains, however improbable, must be the truth."

Inspector Lestrade is back again to Sherlock... Seeking his guidance...

If you think you have it in you to become Data Sherlock... This problem is for you...

What do we have for you?

Data about Indian Police Force and different Crimes happening across the country

!

What do we need from you?

New Batch of Trained Police force is available at your disposal. How would you allocate them across different states? Give us a percentage split for each state

Derive insights beyond the Obvious Information / Statistics about the Crime scenario across the Country

?

Now stop fighting with your partner on who is Sherlock and who is Dr. Watson and start understanding the data...

And By the Way... Don't get lost in the data... We can't have another Sherlock to search for you!!!
